

[Letter from Diane Campagna to Alameda County Waste Management Authority – Jan 10, 2005]

Am writing to you with concerns of the proposed “dump site” on Andrade Rd. as not only a person who lives in Sunol but most importantly living on Andrade Rd. I know you have heard all the complaints regarding odor, traffic, water, noise, health issues. I would like to bring to your attention that the Sunol area is, when you think about it, the only small Agricultural community in Alameda County. It has taken a lot of hard work and effort among many people to keep it this way and it would really really be a shame to have this beautiful scenic area ruined by a compost waste facility. Keeping that in mind, I can’t tell you how many families come out our way with their kids “Stop” get out of their vehicle to look at and pet the animals (kids love to see horses and cows up close) and not to mention the wildlife. They take pictures of our lovely surroundings and tell me how lucky and fortunate I/we are to live in such an environment. So please, help us keep the peace and tranquility of these surroundings and “trash” the dumpsite proposal.

Thank you,
Diane and John Campagna
