

Dear Beverly,

I just recently purchased a home (May 2004) on Sheridan Road in Sunol. Unfortunately the previous owner did not disclose that a dump was being considered and said she had no knowledge of it. In October I was informed by my neighbors of the potential site.

I moved to Sunol for its beauty, fresh air and quiet country living. I am an asthmatic and haven't had to use any inhalers since I moved to Sunol. I am scared to death what this will do to my health and much more about our kids health.

I also understand that this is a very dangerous fire hazard and in the summer our hills are very dry.

Please vote against putting the compost site in Sunol, there are several other sites that have been identified and would not cause danger to Home owners.

Regards,
Laurie
